

VIKASH GUPTA

+91-7978227479 | vik80sh@gmail.com | linkedin.com/in/vik80sh | github.com/vik80sh | Hyderabad, India (Open to Relocation)

Full-Stack Software Engineer with 8 years of experience architecting and building scalable web applications and enterprise platforms. Proven frontend expertise in React.js, JavaScript, TypeScript, Next.js, and Redux, paired with hands-on backend development in Java and Spring Boot - building REST APIs and integrating enterprise systems. Delivers high-performance, data-driven applications across retail and enterprise environments, backed by a strong foundation in data structures, algorithms, and system design.

SKILLS

Frontend: React.js, JavaScript, TypeScript, Redux, Next.js, HTML5, CSS3

Backend: Java, Spring Boot, Node.js, GraphQL, REST API, MySQL

Other: Git, JIRA, Unit Test (Jest), System Design, Problem Solving, Analytical Skills, Data Structures

EXPERIENCE

ServiceNow - Senior Software Engineer

Sep 2025 - Present

- Work on the Impact application foundation team, integrating multiple enterprise systems with the Impact platform.
- Implement role-based access integrations with upstream systems using Kafka, enabling reliable data flow to downstream systems.
- Develop new application pages end-to-end, connecting UI, backend APIs, and databases.
- Build data synchronization and integration flows between client systems and the central Impact system.
- Maintain and enhance existing application functionality, including API integration, data flows, and production issue resolution.

Tech & Tools: React, JavaScript, TypeScript, Java, Node.js, Data Structures, CSS3, Git, JIRA, Unit Testing

Walmart - Software Engineer III

Jan 2022 - Sep 2025

- Built dynamic, interactive floor plans for Walmart stores using Fabric.js as a core contributor to the Category Space Allocation project - supporting product-category placement, drag-and-drop rearrangement, cell-dimension adjustments, and category rotation to significantly speed up and simplify store layout planning.
- Contributed to the Store Allocation Insights Dashboard, which helped boost Walmart's sales by 2%, building a chart component with item-removal analysis, quantity adjustments, dynamic filtering, axis customization, and top/bottom-performer filtering to support data-driven planning decisions.
- Built an ag-Grid-based data table to display item-level sales, profit, and unit details with efficient editing, search, filtering, and pagination.
- Implemented amCharts map visualizations to show how specific items were distributed across store locations on city maps.

Tech & Tools: React.js, TypeScript, Redux, Next.js, Node.js, Java, Spring Boot, Data Structures, Unit Testing

HashedIn by Deloitte - Software Engineer II

Mar 2021 - Jan 2022

- Developed a responsive internal website for Volunteer Search functionality, optimized for desktop, tablet, and mobile.
- Built and integrated both functional and class React components, extending functionality with GraphQL.
- Contributed reusable code modules to the shared project repository, accelerating delivery on future projects.
- Collaborated with the team to brainstorm and propose new features and their implementation approach.

Tech & Tools: React, JavaScript, TypeScript, GraphQL, Data Structures, CSS3, Git, JIRA, Unit Testing

MindTree - Engineer

Jun 2018 - Mar 2021

- Worked as a Frontend Developer on a prominent Dubai hotel-chain booking website, including the renowned Burj Al Arab.
- Translated client business requirements into improved, functional user experiences.
- Actively participated in code reviews, ensuring peer code adhered to team coding standards.

Tech & Tools: React, JavaScript, REST API, Data Structures, CSS3, Git, JIRA

EDUCATION

B.Tech, Computer Science and Engineering - KIIT University, Bhubaneswar (2014-2018) - 7.59/10

12th (Math, Chemistry, Physics) - K.L.S. College, Nawada (2013) - 72.5/100
